Reset a user's course

Steve Webster - 2015-10-30 - in User Login Issues

- Click Administrator Menu
- Click Users
- Search for user
 - Search looks at username, first and last names (but not first and last names together), and email address. Does not look at Contact ID
- Click on the pencil on the right side of the screen
- You will be able to see the information about the user
 - Do not change this information here... It will change again when user logs into Academy from Webpoint.
- In icons running down right side of screen, go to Enrollments
- You can see details of user's learning history
 - Navigate to desired course and hit the double green arrows in the Reset column.
