Why can't I take courses on my Apple mobile device?

Ben Pearman - 2015-09-04 - [0 Comments](#) - in [Compatibility](#)

iOS for Apple mobile devices will not execute media auto-play commands. The course relies on the playing of recorded audio (narration) to trigger the appearance of the navigation buttons (once the audio on a page finishes playing the first time, a command to show the navigation buttons is executed). Developing versions of our courses for mobile platforms is planned, but for now access is limited to desktop and laptop computing environments.
