Why do my IMPACT exam questions change every time I take an exam?

Ben Pearman - 2016-10-25 - in Courses

The IMPACT Exam is programmed to randomly select 50 questions from a pool of 121. It is designed to retain your original questions and answers per testing session, but if you close the exam window before you achieve a passing score, it will randomly select another 50 questions the next time you open it. We recommend that you allow at least 1 hour for taking and correcting your exam in one session.
